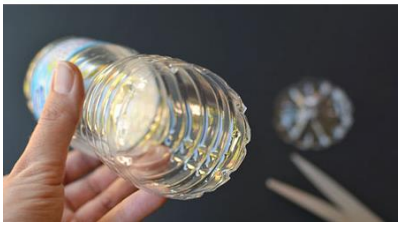
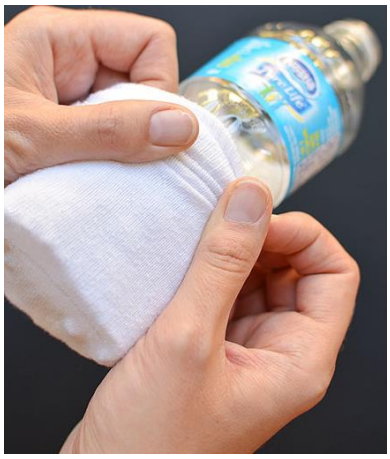
Making bubble snakes:

It is a perfect summer time activity. Just remember to blow air out and not suck in, or else you are eating bubbles!

What you will need:

- Empty water bottle
- Shallow container
- Masking tape or elastic band
- A sock missing its match
- Dish soap
- Scissors
- Optional: Food colouring

What to do:




1. Cut the bottom of a water bottle off and slide the sock over the bottom of the bottle.
2. Use the tape or a rubber band to secure the sock.
3. Pour dish soap and a little bit of water into a shallow container and mix.
4. Dip the sock covered bubble blower into the solution and gently blow.
5. Optional: Add different food colouring drops onto the sock-covered end of the bottle to make a rainbow bubble snake!
