My trip to Idle valley

✓ TA

On the 24th of March 2015, the year 4 ^{PT} children at Scotholme primary school, visited Idle valley nature reserve. Idle^{RC} valley, which is in north Nottinghamshire is a place where you learn about water. We travelled by coach. Also in Idle valley they teach us about rivers.

taught PT ✓

TA

When we arrived, we split into three groups to do activities called Kingfishers, Herons and Robbins. The activities were pond dipping, river walk and water filtration. In pond dipping we learnt what kind of creatures lived in the rivers

✓ like, Stonefly nymph, freshwater shrimp,

leech,

• crayfish,

• caddis larva,

• flat worm,

• water boatman,

• snails, ✓

• frogs &

• river limpet etc.

Bullet points / Information

✓ When we were doing the river walk, we saw a meander and names of things in rivers like the weir.

Then we did water filtration, that is where you turn dirty water into clean. We used mass, charcoal and sand. Then we went to see a tank poo tank.

Like this ☺

While the kingfishers were all dry and cosy doing water filtration, the Herons & robbing were getting soaked in the rain doing pond dipping & the river walk. Did you know that we drink water from millions of years ago.

Overall I would rate this trip $\frac{10}{10}$. I would definitely recommend going again.

I really like your recount Anqa. It sounds like you had the best time! I can also tell that you learnt loads as well!

Fabulous work (5pp)

Task: To write a longer conclusion (summary)

Overall this was a great trip. I give this trip $\frac{10}{10}$. I would definitely recommend going again because it teaches you alot about ~~water~~ rivers and also the activities were great.
